Center: Fictional Sample City Community 1 · fictional-local-0-000

WHAT STANDS OUT IN THIS AREA

Infection prevention and control: 55.0% here versus 42.5% statewide (about 13 percentage points higher).

Accidents and supervision: 40.0% here versus 35.0% statewide (about 5 percentage points higher).

80

Facilities surveyed

80 facilities in the area

317

Citations

Standard health-inspection
findings

7

Facilities with actual harm

27 citations · G-I

8

Facilities with immediate
jeopardy

10 citations · J-L

CMS publication can lag inspections. The latest listed date does not mean complete inspection coverage through that date.

Priority areas for team review

- 1 Infection prevention and control · F880** COMMONLY CITED
44 of 80 surveyed facilities (55.0%) had this tag.
With: Infection preventionist, DON. Bring: Infection policy, surveillance and outbreak logs.
Ask: Do surveillance findings lead to timely action under our policy? [Infection Control guide](#)
- 2 Accidents and supervision · F689** SERIOUS FINDINGS
10 facilities had actual-harm or immediate-jeopardy findings for this tag.
With: DON, direct-care team. Bring: Safety policy, incident reviews and care plans.
Ask: Do safety plans address each resident's current supervision needs? [CMS survey resources](#)
- 3 Pressure ulcer / injury care · F686** SERIOUS FINDINGS
7 facilities had actual-harm or immediate-jeopardy findings for this tag.
With: Wound nurse, DON. Bring: Skin-care policy, assessments and treatment records.
Ask: Do assessments, prevention plans and recorded care agree? [Wound / Pressure Injury guide](#)
- 4 Quality of care · F684** INCREASING SHARE
Observed facility share rose 22.5 percentage points between the comparison periods.
With: DON, medical director. Bring: Care plans, orders and recent care records.
Ask: Does recorded care match current orders and resident needs? [CMS survey resources](#)
- 5 Chemical restraints / psychotropic use · F605** INCREASING SHARE
Observed facility share rose 17.5 percentage points between the comparison periods.
With: DON, consultant pharmacist. Bring: Psychotropic policy, consent and monitoring records.
Ask: Do the rationale, resident involvement and follow-up agree? [Psychotropic Medications guide](#)

Most common deficiency tags (F-tags)

Top 15 by distinct facilities cited. Each facility counts once per tag. Shares do not add to 100%.

TAG	YOUR AREA		STATE RATE	NATIONAL RATE
F880 Infection prevention and control	44 of 80 facilities	55.0%	42.5% 102 of 240	38.4% 246 of 640
F812 Food safety and handling	34 of 80 facilities	42.5%	37.5% 90 of 240	35.6% 228 of 640
F689 Accidents and supervision	32 of 80 facilities	40.0%	35.0% 84 of 240	33.8% 216 of 640
F686 Pressure ulcer / injury care	26 of 80 facilities	32.5%	31.7% 76 of 240	31.6% 202 of 640
F656 Comprehensive care plan	25 of 80 facilities	31.3%	29.6% 71 of 240	28.9% 185 of 640
F684 Quality of care	23 of 80 facilities	28.8%	29.6% 71 of 240	29.8% 191 of 640
F757 Unnecessary medications	18 of 80 facilities	22.5%	24.2% 58 of 240	25.0% 160 of 640
F881 Antibiotic stewardship	18 of 80 facilities	22.5%	22.5% 54 of 240	22.5% 144 of 640
F605 Chemical restraints / psychotropic use	17 of 80 facilities	21.3%	25.4% 61 of 240	26.4% 169 of 640
F725 Sufficient staffing	16 of 80 facilities	20.0%	22.5% 54 of 240	23.4% 150 of 640
F760 Significant medication errors	11 of 80 facilities	13.8%	18.8% 45 of 240	20.2% 129 of 640
F690 Incontinence and catheter care	10 of 80 facilities	12.5%	17.5% 42 of 240	18.8% 120 of 640
F697 Pain management	9 of 80 facilities	11.3%	15.4% 37 of 240	17.0% 109 of 640
F600 Abuse and neglect	7 of 80 facilities	8.8%	13.8% 33 of 240	15.5% 99 of 640
F755 Pharmacy services	7 of 80 facilities	8.8%	12.9% 31 of 240	14.2% 91 of 640

State = Ohio. National = 50 states and DC. Rates use the same source release, inspection window and counting rules.

Rates include surveyed facilities with no citations. The purchased report's CSV includes all 20 cited tags, with citation totals, plus state and national counts and rates.

Serious findings

Ranked by distinct facilities with actual-harm or immediate-jeopardy findings. Historical findings do not establish a facility's current status.

7

Facilities with actual harm

27 citations · severity G-I

8

Facilities with immediate jeopardy

10 citations · severity J-L

WHAT THESE MEAN

Actual harm: physical or psychosocial harm without immediate jeopardy.

Immediate jeopardy: noncompliance caused or is likely to cause serious harm, even without actual injury.

TAG	FACILITIES	CITATIONS		G-I	J-L
		HARM	JEOPARDY		
F689 Accidents and supervision	10			7	3
F686 Pressure ulcer / injury care	7			5	2
F684 Quality of care	5			4	1
F760 Significant medication errors	3			2	1
F880 Infection prevention and control	3			2	1
F600 Abuse and neglect	2			1	1
F605 Chemical restraints / psychotropic use	2			1	1
F690 Incontinence and catheter care	2			2	0
F697 Pain management	1			1	0
F725 Sufficient staffing	1			1	0
F757 Unnecessary medications	1			1	0

Bars show citations on the same count scale, split by severity. G-I and J-L columns give the exact citation counts. The facilities column counts each facility once per tag; it may differ from the combined citation count. Facilities can appear under multiple tags and severity groups.

How published findings differed between periods

Shown when at least five facilities were cited in either period and observed share changed by at least three percentage points. This display filter is not a statistical significance test.

- Earlier: Dec 1, 2025 - Feb 28, 2026 · 40 facilities surveyed
- Later: Mar 1, 2026 - May 29, 2026 · 40 facilities surveyed

Same 0-100% scale for every bar.

Largest increases

F684	Quality of care	+22.5 pp
Earlier		17.5% · 7 of 40

F880	Infection prevention and control	-10.0 pp
Earlier		60.0% · 24 of 40
Later		50.0% · 20 of 40

Reading these changes

Changes do not establish causes or predict outcomes; earlier periods may be revised. The purchased report includes complete comparisons in its CSV.

How to read this report

What is counted	Published standard health-inspection citations in your area and inspection window. Complaint-only inspections are excluded. This report uses inspection records published in the selected CMS release for the dates shown. CMS files contain a limited rolling history; records may be added, revised or removed in later releases. Publication can lag inspections.
Facility share	Distinct facilities cited for a tag divided by surveyed facilities, including those surveyed with no citations. Shares are not additive. State/national rates use the same window. National pools facilities across 50 states and DC, excludes territories, and is not an average of state rates.
Severity	G-I: actual harm without immediate jeopardy. J-L: immediate jeopardy, which can occur without actual injury.
Data timing	CMS release: Sep 30, 2026. Latest listed inspection in this area: May 15, 2026. Publication can lag inspections; this does not establish complete coverage through that date.
Comparisons	Descriptive comparisons of published records. Changes may reflect inspection mix, publication lag or revisions.
Area	Distance is measured in straight-line miles and may cross state borders. Facility locations reflect this report's source release.

Purchased report data file (CSV)

The purchased report includes the complete CSV; this standalone sample is PDF only. Every cited tag, CMS description, counts, selected comparisons and matched benchmark rates. Open in Excel or Google Sheets. Unavailable values are blank and explained.
